# GREEN EVENTS

With its concept for green events, the Liederhalle proves that ambience and environmental protection are not mutually exclusive. The landmarked architecture offers a stylish setting for your event. Ideal public transport connections and state-of-the-art building and air-conditioning technology guarantee a favorable CO2 balance.

## CLIMATE FRIENDLY TRAVEL

- Central station 15 minutes walk and S-Bahn stop only 5 minutes walk away
- City train and bus stops directly in front of the door
- Deutsche Bahn event ticket offer for CO2-neutral travel at a low fixed price
- Congress tickets entitle the holder to use public transport
- DB Call a Bike station and e-mobility charging stations
- E-mobility sharing offers for cars, scooters and scooters
- Accessibility

## CENTRAL LOCATION

- In the heart of Stuttgart
- Sights and shopping facilities accessible without a car
- underground connection to the MARITIM Hotel Stuttgart
- direct neighborhood to the Bosch-Areal with bars, restaurants, shopping facilities, fitness studio, etc.

## CATERING

- On request regional, organic and fair catering by our catering partner MARITIM Hotel Stuttgart
- Supply contracts with regional partners

## WASTE PREVENTION

- Waiver of disposable tableware
- Further processing of food waste by organic waste disposal companies

## WATER

- Energy- and water-saving rinsing lines
- Decentralized water treatment to avoid unnecessary supply of hot water
- Water-saving faucets and cisterns in all sanitary facilities
- Electronically programmable flushing systems in the sanitary facilities
- Use of environmentally friendly and biodegradable cleaning agents

## CONSULTING AND SERVICE

- Consulting and sustainability checklist for your event
- Barrier-free work
- Only products from the Stuttgart-based manufacturer SPEICK-Naturkosmetik are used in all soap dispensers at the Liederhalle
- No artificial room fragrances are used
- Seasonal and environmentally friendly decoration

## ENERGY CONCEPT, TECHNOLOGY AND INNOVATION

- 100% green power
- state-of-the-art network with Aruba components
- professional realization of virtual events
- climate-friendly use of district heating
- state-of-the-art building management system
- use of energy-saving light sources and motion detectors

## CO2 COMPENSATION

Unavoidable emissions at an event, e.g. by participants traveling by car or plane, can be calculated by us and offset by supporting meaningful carbon offset projects. We recommend GlobeClimate, the climate protection initiative of the environmental foundation NatureLife-International.
